

Six Compelling Reasons that make MySATHI the RIGHT choice for your University

1. Alternate Entry Gate — Not a replacement of current Entrance process

mySATHI is designed as a new-generation exam that evaluates the **4Cs—Critical Thinking, Creativity, Collaboration, and Communication**. This is not positioned as a replacement to your current entrance exam, but rather as an **alternate entry gate** that is more attuned with the future and to attract students of diverse aptitude and backgrounds. Universities worldwide adopt such dual pathways, as you would already be aware. A few are listed below:

- IIMs, SMU, ESSEC France (CAT + GMAT),
- IITs, NUS, NTU (JEE + SAT)
- Ashoka University (SAT/ACT + Board marks)
- SRM (JEE + own test), Amrita University (JEE + SAT).
- Harvard, Stanford, MIT (SAT/ACT + AP/IB),
- Oxford, Cambridge (A-Levels + STEP/IELTS),
- University of Toronto (IB + SAT),
- University of Melbourne (ATAR + SAT) and dozens more.

2. Zero Cost, Zero Resources, Zero Bandwidth

Becoming an Anchor Partner of mySATHI requires **no cost, no resources, and no bandwidth commitment from you**. All outreach, application generation, operational and logistical effort will be fully borne by the mySATHI Foundation and its implementation partner, **DEXIT Global**. Your admissions office continues its current processes seamlessly, while also benefiting from the wider applicant pool mySATHI brings from far corners of India and abroad.

3. Expanded Reach and Diversity

Through mySATHI, your institution can immediately tap into **400+ locations** across India, the Middle East, East Africa, Singapore, Nepal, and Indonesia, with **1,000+ trained personnel** and permanent offices supporting these operations. This will bring a broader geography of applications, adding diversity and reach without additional effort from your side.

4. Scale, Credibility, and Proven Experience

DEXIT Global, our implementation partner, conducted **15 million assessments last year**, ranking as the **fourth largest assessment delivery network worldwide** (after ETS, Prometric, and Pearson VUE). We present this not as a claim, but as quiet reassurance that your institution can rely on a tested, secure, and globally benchmarked infrastructure.

5. Future Trajectory — mySATHI among the Global Top Five

With its academic foundation, scalable technology, and school outreach through **10,000+ schools already connected to DEXIT**, we foresee mySATHI becoming one of the **top five global exams** in three years, alongside Gaokao, NEET, JEE, CUET, and SAT. Early Anchor Partners like yourself will enjoy both prestige and influence in shaping this journey.

6. Privilege of Anchor Partner Status

We are honoured to propose that your institution be accorded the distinction of an **Anchor Partner Institution** for mySATHI. This is a perpetual privilege offered **at no cost**, recognizing your pioneering role in education.

Next Step: Orientation Session / Joining the Pilot and Validation Studies

To build further clarity and confidence, we would be privileged to arrange a **Zoom orientation** for your empowered committee overseeing admissions. This session will be led by:

- **Prof. Partha Pratim Chakrabarti (PPC)**, Former Director, IIT Kharagpur & Chairman, Assessment and Technology Committee, mySATHI Foundation
- **Mr. Subrahmanyam**, Chairperson, mySATHI Foundation
- Members of the mySATHI assessment design team

Alternatively, you are invited to join the anchor member institutions participating the Pilot and Validation studies that are underway. These interactions and feedback sessions will provide full academic transparency and allow your committee to evaluate the mySATHI framework firsthand as mySATHI progresses towards student registrations and inauguration in December 2025 for admissions season of 2026-27.
